

# KONVA

The Greek seafood expert

# Global Presence - Exports

Reliability, consistency, and flexibility are the core values upon which we build long-term, stable relationships with partners and suppliers in Greece and around the world.

# From Greece to the World

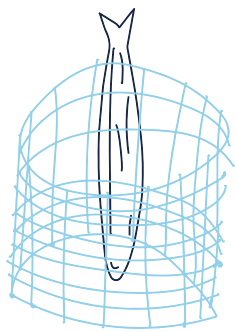

We take pride in our seafood

For three generations, the sea has been our source of inspiration, connecting us with the world.

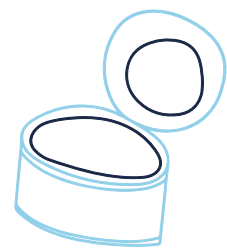

We continue to evolve—expanding our product range and refining our production methods—to ensure exceptional quality and taste. At the same time, we remain attentive to the needs of consumers worldwide, offering accessible and nutritious food solutions.

In doing so, we ensure our customers can always rely on value-added products that support a healthy and balanced diet.

We are one of the most advanced seafood processing industries in the European Union and the only Greek company specializing in canned seafood.

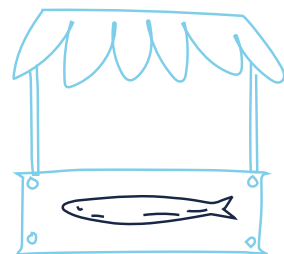

**80 tons**  
of fish processed  
daily

**400,000 cans/day**  
maximum production capacity

**250+**  
employees

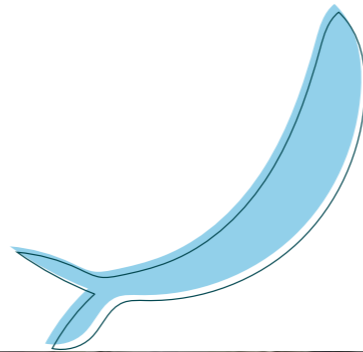

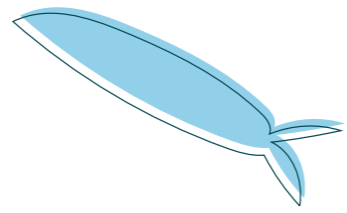

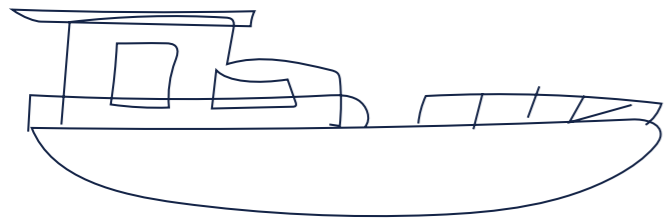

**70**  
TRATA & FLOKOS  
product codes in  
Greece

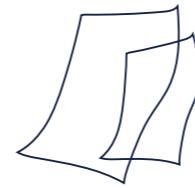

# Product Innovations

We always dare to offer something new to the market

Our long-standing history is defined by continuous investment in infrastructure and cutting-edge technology. Backed by experience and expertise, our dedicated team consistently drives meaningful product innovation.

**State-of-the-art infrastructure & technology:**  
New pouch production line

**Pioneering excellence:**  
Natural smoking production line

**Award-winning**  
Over 30 international awards and distinctions

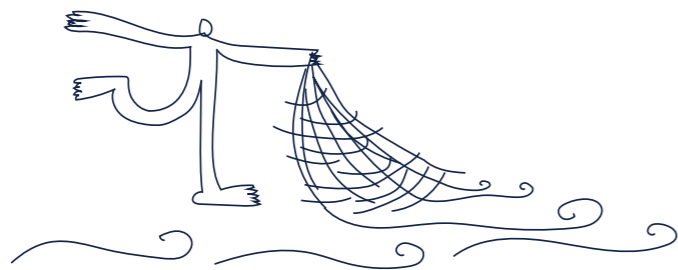

# Top Quality

We continue the market's trust for over 100 years

Our goal is to ensure the highest quality and superior taste for all our products. Thus, we have established strict control procedures and monitoring guidelines to rigorously oversee all stages of production, packaging, storage, and distribution.

### Our quality pledge

- 1. Product manufacturing without additives, preservatives, colorants, or flavor enhancers**
- 2. Carefully selected and evaluated suppliers**  
Strict specification are applied to all primary and auxiliary materials we use. Inspections are rigorously performed according to procedures drafted by the Quality Assurance Department and the company's Chemical Consultant.
- 3. High-quality raw materials**

The health and safety of our consumers is our primary concern and guides our operations.

### International Quality Certifications

# Respect the Environment

We support responsible fishing and sustainable development practices

We firmly believe that progress and growth are achievable only within a healthy natural environment, where practices beneficial to people prevail.

### Good fishing practices

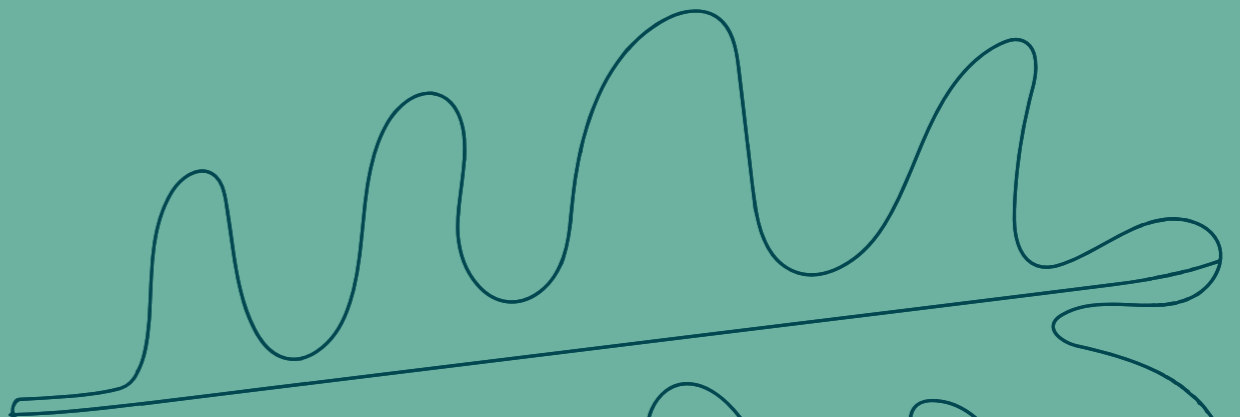

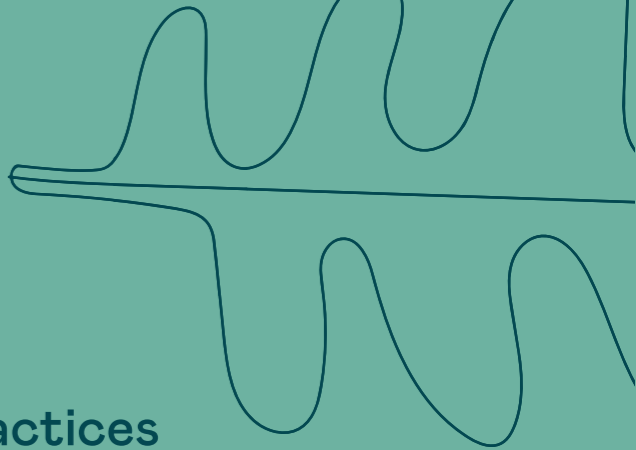

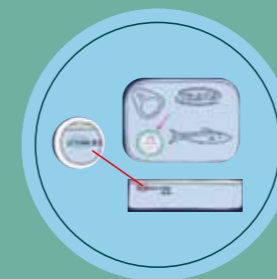

We invest in the research and application of our "Track & Trace" system, which transparently records our fish journey, from fishing to the final production stage.

We collaborate with the independent, global, non-profit organization **MSC Chain of Custody**, ensuring sustainable management of fisheries through:

1. Sourcing fish from fisheries strictly adhering to regulations, with our permanent company representative at their facilities
2. Separation from other, non-certified fish
3. Quantity tracking
4. Full transparency and traceability of the supply chain

We respect fish reproduction periods, pausing fishing during winter months.

**Our vision at KONVA is to gradually become a "green" factory.**

# TRATA

## Our heart belongs to the sea

We are here to offer premium-quality seafood

Our products are manufactured without additives, preservatives, colorants, or flavor enhancers. We use only wild-caught fish.

**From Greece  
to the World**

**#1 Greek Company for Canned Fish**
